

ENGLISH v9

Unit – Information Reports – The Moon

Students will engage with a range of information texts on the Earth's resources with a focus on water. They will also study the moon, as well as the solar system and compare these texts with features of imaginative texts. Students will create informative texts, using simple and compound sentences with topic-specific vocabulary and language to express and develop ideas.

SPELLING/ VOCABULARY – Sound Waves Units 11-20

READING - Students will learn and consolidate strategies used to decode texts. Reading at home is an important part of their reading program and will continue to be encouraged.

HIGH FREQUENCY WORDS - Students will continue to expand their vocabulary and develop knowledge of high frequency (irregular words) to support their reading fluency.

MATHEMATICS v9

Number & Algebra

- recognise that mathematics can be used to investigate things students are curious about, to solve addition and subtraction problems and model everyday situations, describing thinking and reasoning using familiar mathematical language
- partition and combine numbers flexibly, recognising and describing the relationship between addition and subtraction and employing part-part-whole reasoning and relational thinking to solve additive problems
- use number sentences to formulate additive situations
- use mathematical modelling to solve practical problems involving authentic situations by representing problems with physical and virtual materials, diagrams, and using different calculation strategies to find solutions
- compare and contrast related operations and use known addition and subtraction facts to develop strategies for unfamiliar calculations
- partition collections, shapes and objects into equal parts and build a sense of fractions

Measurement

- use uniform units to measure, compare and discuss the duration of events
- reads time on an analog clock to the hour, half hour and quarter hour

SCIENCE

Unit – Save Planet Earth

Students study the Water Cycle and describe how Earth's water resources are used and the importance of conserving/protecting these resources for the future of all living things. They use informal measurements to record observations from experiments.

Students use their science knowledge of conservation to propose and explain actions that can be taken to conserve Earth's water resources, and decisions they can make in their everyday lives. Students will also learn how Aboriginal peoples and Torres Strait Islander peoples use their knowledge of conservation in their everyday lives.

HASS (Humanities & Social Sciences)

Unit – Present connections to places

Inquiry question:

- How are people connected to their place and other places?

In this unit, students will learn about how people connected to their place and other places in the world?

Students will explore the following: Personal, local, regional, national, and global scales, continents and oceans of the world, states and territories of Australia, and significant places.

MUSIC

Unit - Elements & Principals within Music:

Students will continue to build on aural skills by singing and playing instruments with accurate pitch, rhythm and expression. They will describe and discuss similarities and differences between music they listen to, compose and perform. Students will discuss how they and others use the elements of music in performance and composition.

Mrs Myatt – kmyat3@eq.edu.au

Health and PE

Health:

Our Culture - Students identify similarities and differences in cultures and how different cultures share their beliefs and celebrations. Students explore how different strengths and achievements are recognised and celebrated.

Physical Education:

Students will be participating in an athletics program. Students will perform fundamental skills in a variety of movement sequences and situations. They will participate in games with and without equipment.

Mrs Johnson – tjohn325@eq.edu.au

DRAMA

Unit: Step, Stomp, and Swing! Exploring Social and Bush Dance

This 10-week Year 3 Dance unit introduces students to social and bush dance styles. Through practical exploration, students will develop fundamental movement skills, spatial awareness, and an understanding of cultural dance traditions in Australia. They will learn and perform structured dance sequences while developing coordination, rhythm, and teamwork. The unit will culminate in a small group performance of a bush or social dance, demonstrating their understanding of movement elements and collaborative skills.

Ms Amber Kemp – akemp45@eq.edu.au
